

TECHNICAL SPECIFICATION for **G-RB2** type **RESCUE BOAT**

GEPA
FIBERGLASS
CO. INC.
TUZLA / İSTANBUL / TURKEY

The G-RB2 type GEPA GRP RESCUE BOATS are designed, constructed and tested according to the latest regulations and standards of “SOLAS” and “IMO”.

Hand applied laminate Rescue Boats are built according to the international standards and reinforced against collisions. The mouldings are in two parts; one for the hull and one for the deck and interior. Seating surfaces and decks having rough design in order to prevent sliding. Fittings, towing and anchoring equipments are made of non-corrosive materials. The Rescue Boat is equipped by a hand start, hand command, water-cooled, long shaft, 15 HP outboard petrol engine with fuel tank for 20 liters. 4 part lifting sling of stainless steel wire with shackles & topring are included.
